SHOP++开发环境搭建

一、系统环境

Windows 7(64位) JDK 7u80(64位) MySQL 5.5.59(64位) Eclipse 4.5.2(64位)

二、JDK 安装配置

1. 运行 jdk-7u80-windows-x64. exe 进入安装程序,点击"下一步",如下图所示:

2. 设置安装项、安装路径,点击"下一步",如下图所示:

3. 等待程序安装完成,点击"关闭",如下图所示:

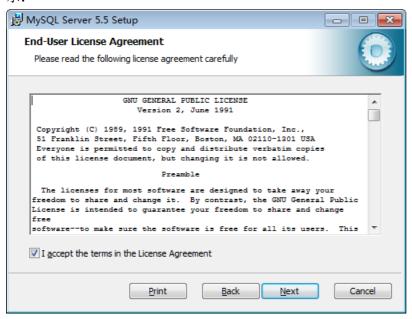

三、MySQL 安装配置

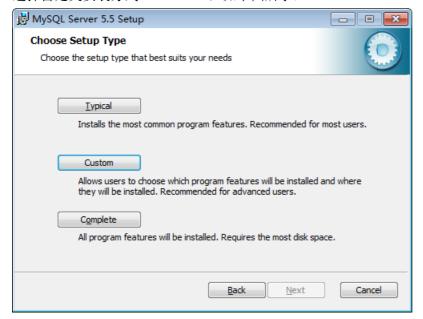

1. 运行 mysql-5. 5. 59-winx64. msi 进入安装程序,点击 "Next",如下图所示:

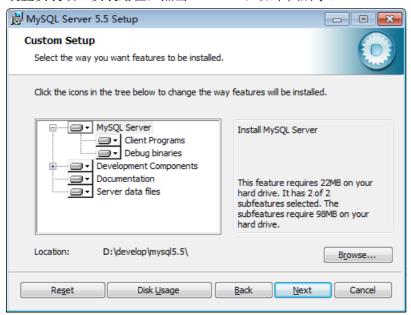

2. 同意用户许可协议,勾选"I accept the terms in the License Agreement"并点击"Next",如下图所示。

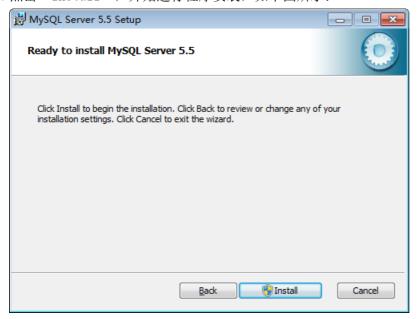

3. 选择自定义安装方式 "Custom", 如下图所示:

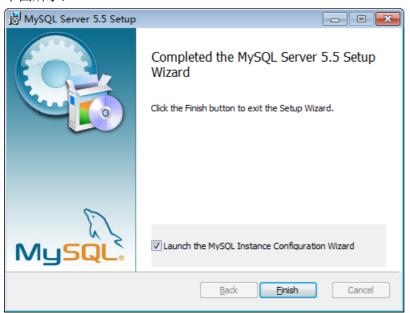

4. 设置安装项、安装路径,点击"Next",如下图所示:

5. 点击"Install", 开始进行程序安装, 如下图所示:

6. 运行 MySQL 配置向导,勾选 "Launch the MySQL Instance Configuration Wizard" 并点击 "Finish",如 下图所示:

7. 点击"Next",如下图所示:

8. 设置配置类型,选择"Detailed Configuration"并点击"Next",如下图所示:

9. 设置 MySQL 服务器类型,选择 "Developer Machine"并点击 "Next",如下图所示:

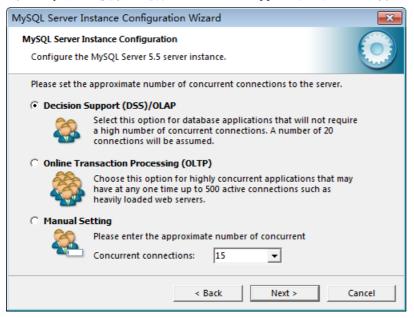

10. 设置 MySQL 应用类型,选择"Multifunctional Database"并点击"Next",如下图所示:

11. 设置数据存储路径,点击"Next",如下图所示:

12. 设置 MySQL 连接数,选择 "Decision Support (DSS) / OLAP" 并点击 "Next",如下图所示:

13. 设置 MySQL 端口,点击"Next",如下图所示:

14. 设置 MySQL 字符集编码,选择"Best Support For Multilingualism"并点击"Next",如下图所示:

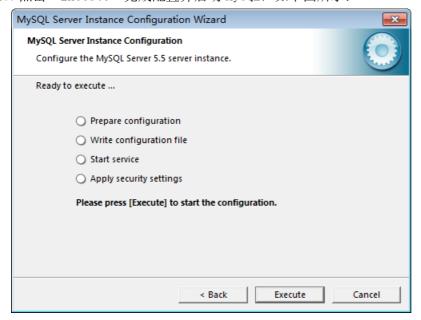

15. 设置 MySQL 服务,点击"Next",如下图所示:

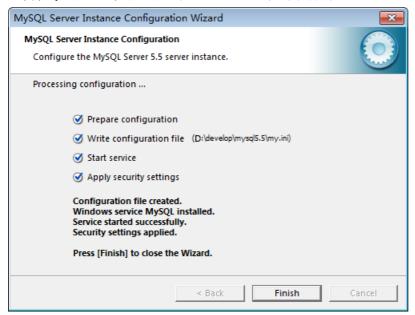

16. 设置 MySQL root 密码,点击"Next",如下图所示:

17. 点击 "Execute" 完成配置并启动 MySQL, 如下图所示:

18. 等待 MySQL 配置完成,点击 "Finish",如下图所示:

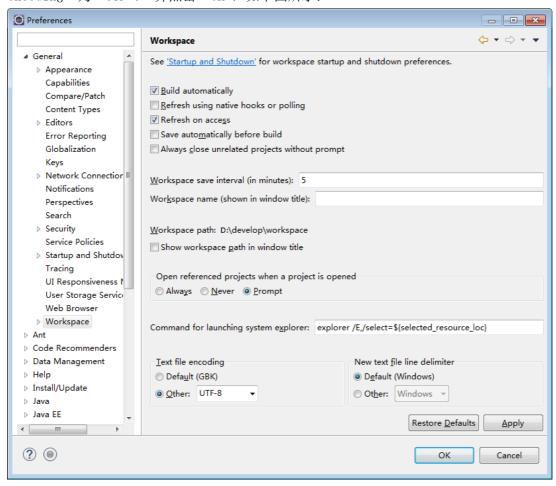

四、Eclipse 安装配置

- 1. 解压 eclipse-jee-mars-2-win32-x86_64.zip 至 D:/develop/eclipse4.5
- 2. 配置 JDK 路径,修改配置文件 D:/develop/eclipse4.5/eclipse.ini 在 "-vmargs"参数之前新增如下内容:
 -vm

D:/develop/jdk1.7/bin

3. 运行 D:/develop/eclipse4. 5/eclipse. exe 进入 Eclipse

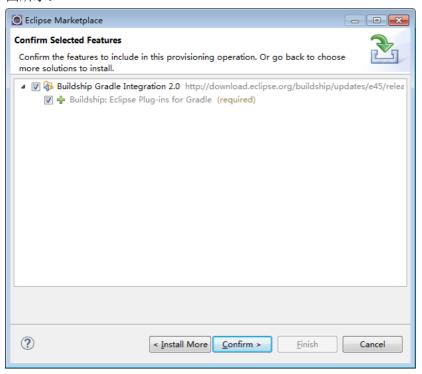

4. 设置 Eclipse 字符集编码,依次进入 Window - Preferences - General - Workspace, 设置 "Text file encoding"为 "UTF-8"并点击"OK",如下图所示:

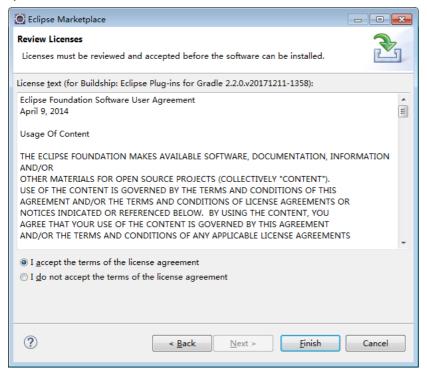

5. 安装 Buildship 插件, 依次进入 Help - Eclipse Marketplace, 在 "Find"输入框中输入 "buildship"并 回车, 然后在 "Buildship Gradle Integration 2.0"项目上点击"Install"进行插件安装, 如下图所示:

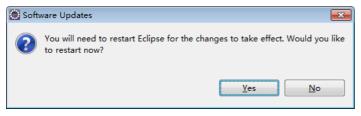

6. 设置插件安装项, 勾选 "Buildship: Eclipse Plug-ins for Gradle (required)" 并点击 "Confirm", 如下图所示:

7. 同意用户许可协议,勾选"I accept the terms of the license agreement"并点击"Finish",如下图所示:

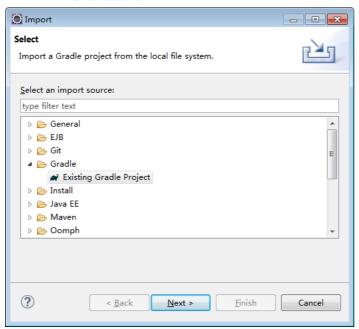

8. Buildship 插件安装完成后需重启 Eclipse 使其生效,点击"Yes"进行 Eclipse 重启,如下图所示:

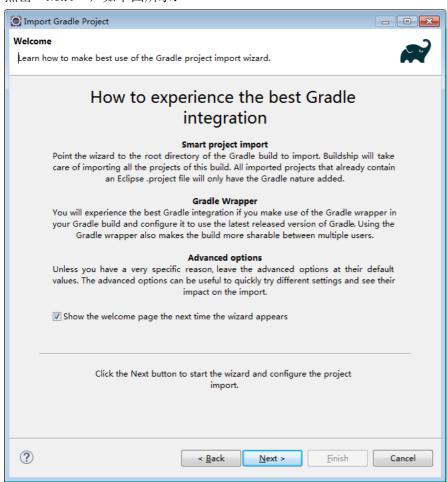

五、SHOP++项目导入

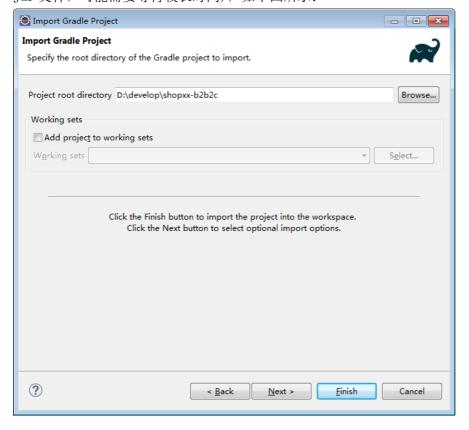

1. SHOP++项目导入,依次进入 File - Import...,选择"Gradle" - "Existing Gradle Project"并点击"Next",如下图所示:

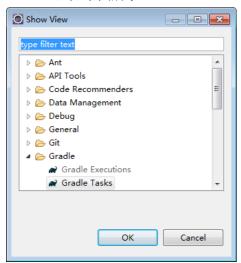

2. 点击"Next",如下图所示:

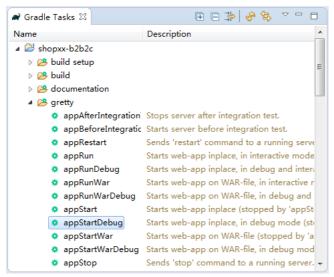

3. 点击 "Browse..."选择 SHOP++项目所在目录并点击 "Finish" (由于导入过程需下载 Gradle 文件以及依赖 Jar 文件,可能需要等待较长时间),如下图所示:

4. 显示 "Gradle Tasks"视图,依次进入 Window - Show View - Other...,选择"Gradle" - "Gradle Tasks",如下图所示:

5. 启动/停止 Tomcat, 在 "Gradle Tasks"双击"gretty" - "appStartDebug/appStop"启动/停止 Tomcat, 如下图所示:

- 6. 调试 Tomcat, 使用 "appStartDebug"启动 Tomcat 后, 依次进入 Run Debug Configurations..., 然后在 "Remote Java Application"项目上右键选择"New", 同时设置"Name"为"shopxx-b2b2c"、
 - "Project"为"shopxx-b2b2c"、"Host"为"localhost"、"Port"为"5005"并点击"Apply",最后点击"Debug"启用调试功能,如下图所示:
